CURRENT AND FUTURE COHORTS AUGUST 30, 2006

Based upon a 2004 Government Accountability Office Report, the Department of Defense (DoD) commenced the declassification of select chemical and biological agent test programs. As a result, DoD now provides the Department of Veterans Affairs (VA) with test program information and a database for each declassified test program for the purposes of outreach, claims adjudication, and health care. Note: A systematic DoD test declassification plan does not exist.

The following document provides an outline of all historic and possible future test releases. The Policy Analysis Service is prepared to brief in detail regarding each identified cohort

HISTORIC RELEASES (1990s to 2006)

COHORT NAME	RELEASE DATES
• Mustard Gas and Lewisite/Other Tests*	1990s and 2004
• Project 112* and Project Shipboard Hazard and Defense (SHAD)*	2001-2004
• Edgewood Volunteers of Edgewood Arsenal *	2006
• Edgewood Arsenal Tests (other)*	2006

FUTURE RELEASES (2007 and beyond)

Biological and Chemical

Project Whitecoat (Fort Detrick, MD)
Fort Detrick Tests (other)
ChemGas Database

CENTRAL INTELLIGENCE AGENCY (CIA) RECORDS

In April 2006, VA outreached to the CIA for information and data relating to their chemical and biological agent tests involving U.S. servicemembers. Limited information has been received on Project OFTEN.

Psycho-chemical

Dugway Proving Ground, UT
Fort Benning, GA
Fort Bragg, NC
Fort Leavenworth, KS
Fort McClellan, AL
Material Testing Program EA 1729
Project DORK
Project CHATTER
Project DERBY HAT
Project THIRD CHANCE
Demilitarization Protective Ensemble*

* Tests include use of nerve and other types of agents.
